TEACHING PHILOSOPHY

My philosophy of nursing education is rooted in the belief that learning is most effective in an environment of encouragement, respect, and high expectations. Since beginning my career as a nurse in the U.S. Air Force, I have drawn upon a wide range of clinical and leadership experiences to enrich my teaching and connect theory to real-world practice. I view my role as an educator as both a facilitator of knowledge and a mentor who fosters critical thinking, self-reflection, and professional growth. I am committed to maintaining rigorous academic standards while creating a supportive learning environment that empowers students to achieve their fullest potential. Above all, I strive to cultivate compassion, accountability, and resilience in future nurses—graduates who not only provide excellent care but also carry forward a commitment to lifelong learning and service to others.
